

One Logic Soft

web and cross platform development

PROFESSIONAL SOFTWARE ENGINEERING SERVICES

Our services

WEB DEVELOPMENT

Web applications creation using modern approaches and technologies, like Angular 1 and 2. We build complex web applications that meet customer needs. We are professionals in high-load solutions that can meet the demands of fast growing business

STARTUP SUPPORT

Creating rapid prototypes, Model-View-Presenter (MVP) and Demos. We have our own startups and know all the pains and startup problems. We know how to minimize the cost and time to impress investors on the early stage

FULL STACK SOLUTIONS

Creating the best software for your business idea come to life. We are strong in building complex, high-load and extendable solutions on backend, frontend and apps levels

INDUSTRY EXPERTISE

We are not just software developers. We have subject-matter experts in aviation, logistics, e-learning and trainings, modeling & simulation, travel and warehousing domains and have experience building software that meets demands of these markets

We offer

Outsourcing

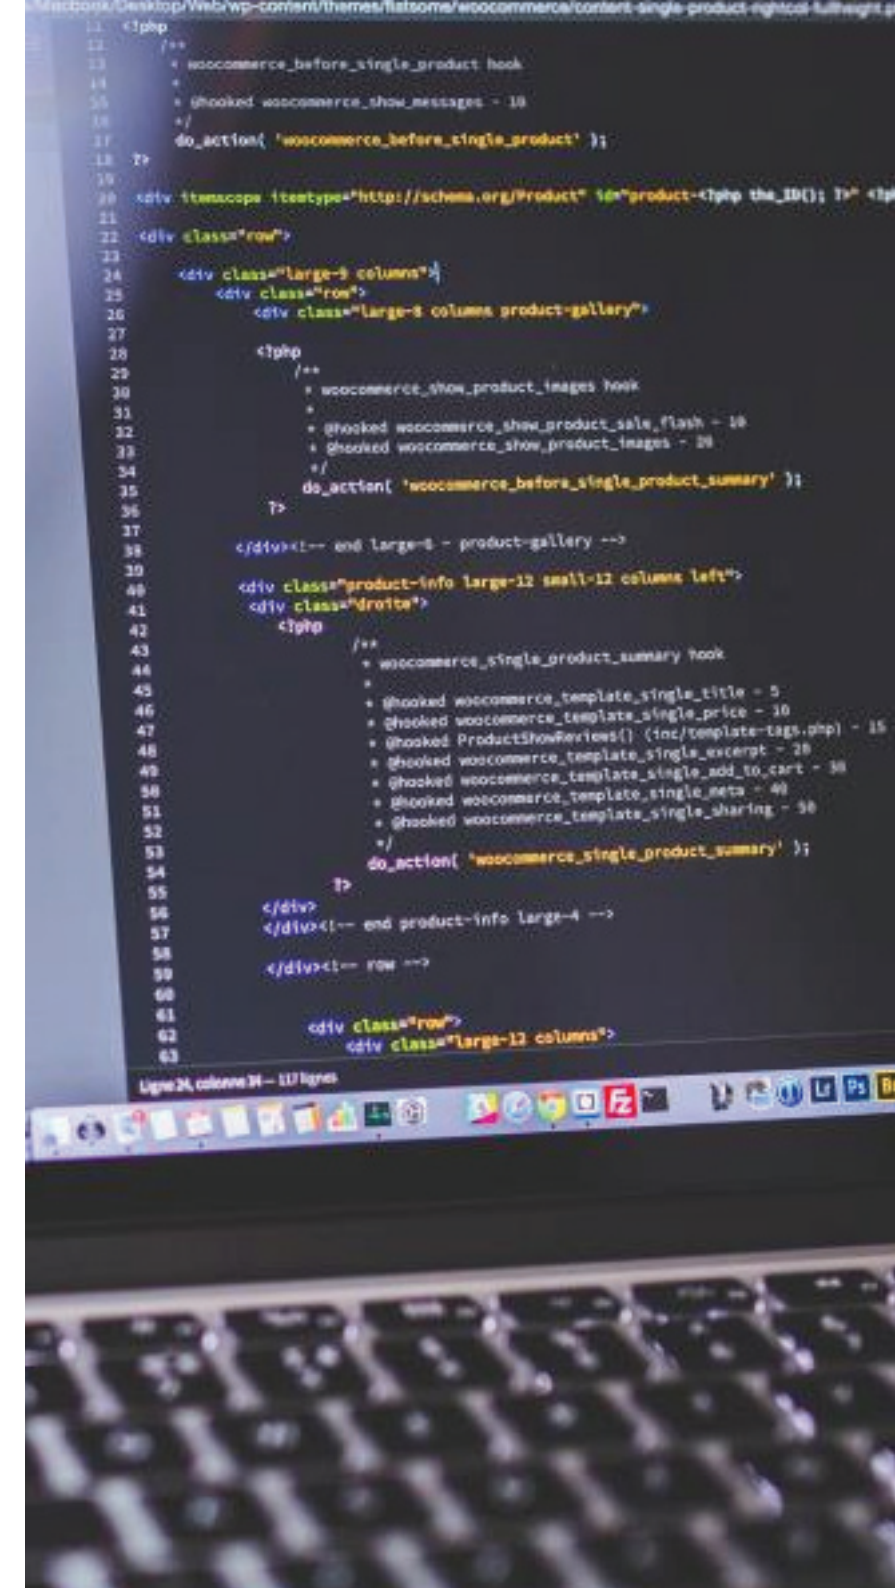

- ✓ Complex web applications development
- ✓ Full-stack solutions development
- ✓ Back end development
- ✓ Front end development

Outstaffing

- ✓ Dedicated team
- ✓ Remote work
- ✓ Qualified specialist for your team

Startup Support

- ✓ MVP development
- ✓ R&D
- ✓ Saving budget

Value

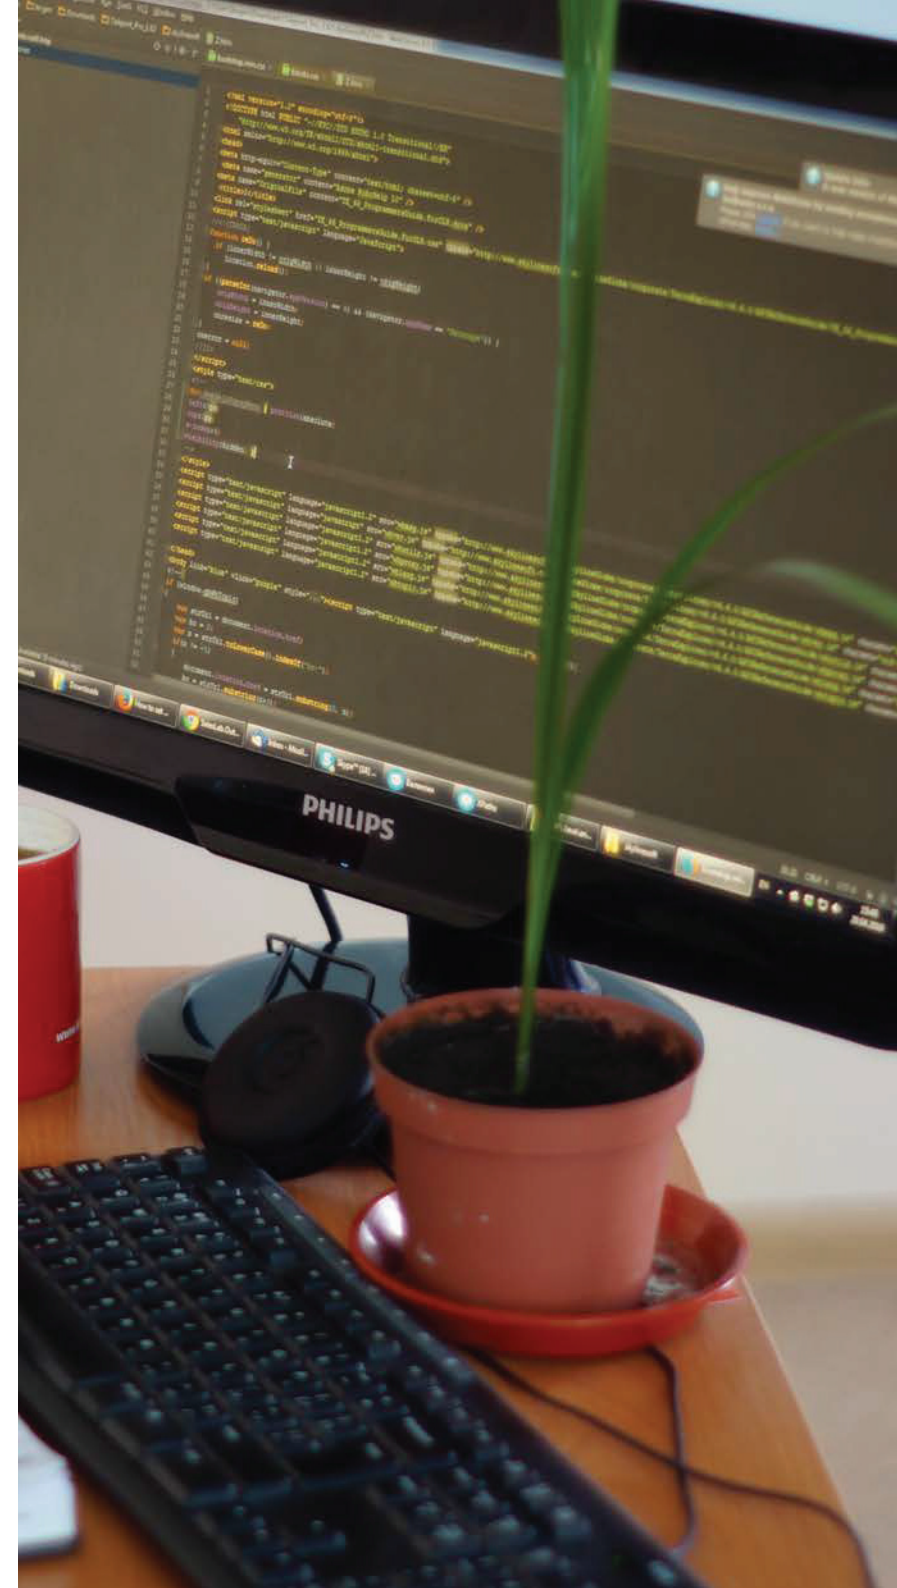

- ✓ Reduce material **costs**
- ✓ Increase **efficiency**
- ✓ Fully **organized** office
- ✓ Comfort **timezone**
- ✓ You pay no **taxes**
- ✓ No **bonuses, vacation** payments
- ✓ No administrative and rental **costs**
- ✓ Flexible **rates** depend on seniority level
- ✓ You pay for hours **worked** not rest
- ✓ Quick access to experienced human **resources**
- ✓ No **freelancers**
- ✓ Project **management**
- ✓ **Reporting**

Technologies

UI/UX
design

Collaboration process

A typical remote team is fully dedicated to the Client and acts as a direct extension of Client's in-house staff

Developers available at your service ANY TIME

Our Project Manager will act like a “buffer” between team of developers and your managers

Some of our work

ONLINE BOOKING AND TRAVEL SYSTEM

It includes sophisticated selection of stage modelus, tour information (including promotional videos), booking and ordering, online reviews and comments on the tour, partner's authorization system, etc.

Stages:

- ✓ Requirements identifying and gathering
- ✓ System design
- ✓ Development,
- ✓ Project testing and launch

Some of our work

Creating tour operator portal
Offers, offer description, integrations with 3rd party
travel systems, news and blog, demo videos

Modules:

- ✓ Tour selection
- ✓ Tour information
- ✓ Ordering
- ✓ Online reviews and comments
- ✓ Partners' authorization system, etc.

TOUR OPERATOR PORTAL

Some of our work

Social network for those who want to earn extra money or find a contractor for work performance. Internal mail, rating system, payment gateways and billing, social connections, full text search

SOPHISTICATED WEB PORTALS

The screenshot displays the 7работ web portal interface. At the top, there's a header with the 7работ logo, a user menu, and a balance of 115.70 грн. Below the header, there's a large banner with a group of people and text: "Здесь все находят Подработку и Специалистов Заказы и Исполнителей Здесь платят реальные деньги".

The main content area is divided into several sections:

- User Profile:** A profile for "Руслан Викторович (47 лет)" with a photo, contact information, and a list of reviews.
- Job Listings:** A list of job postings, including "Региональный менеджер" (10 000 грн) and "Пишу жалобы на соседей" (100 грн/шт).
- Proverbs:** A section titled "Пословицы" with a list of sayings, including "Упорно трудиться - будет хлеб в закромах водиться."

The bottom of the page features a navigation menu with links like "Главная", "О нас", "Служба поддержки", and "Заказать документы".

Our portfolio

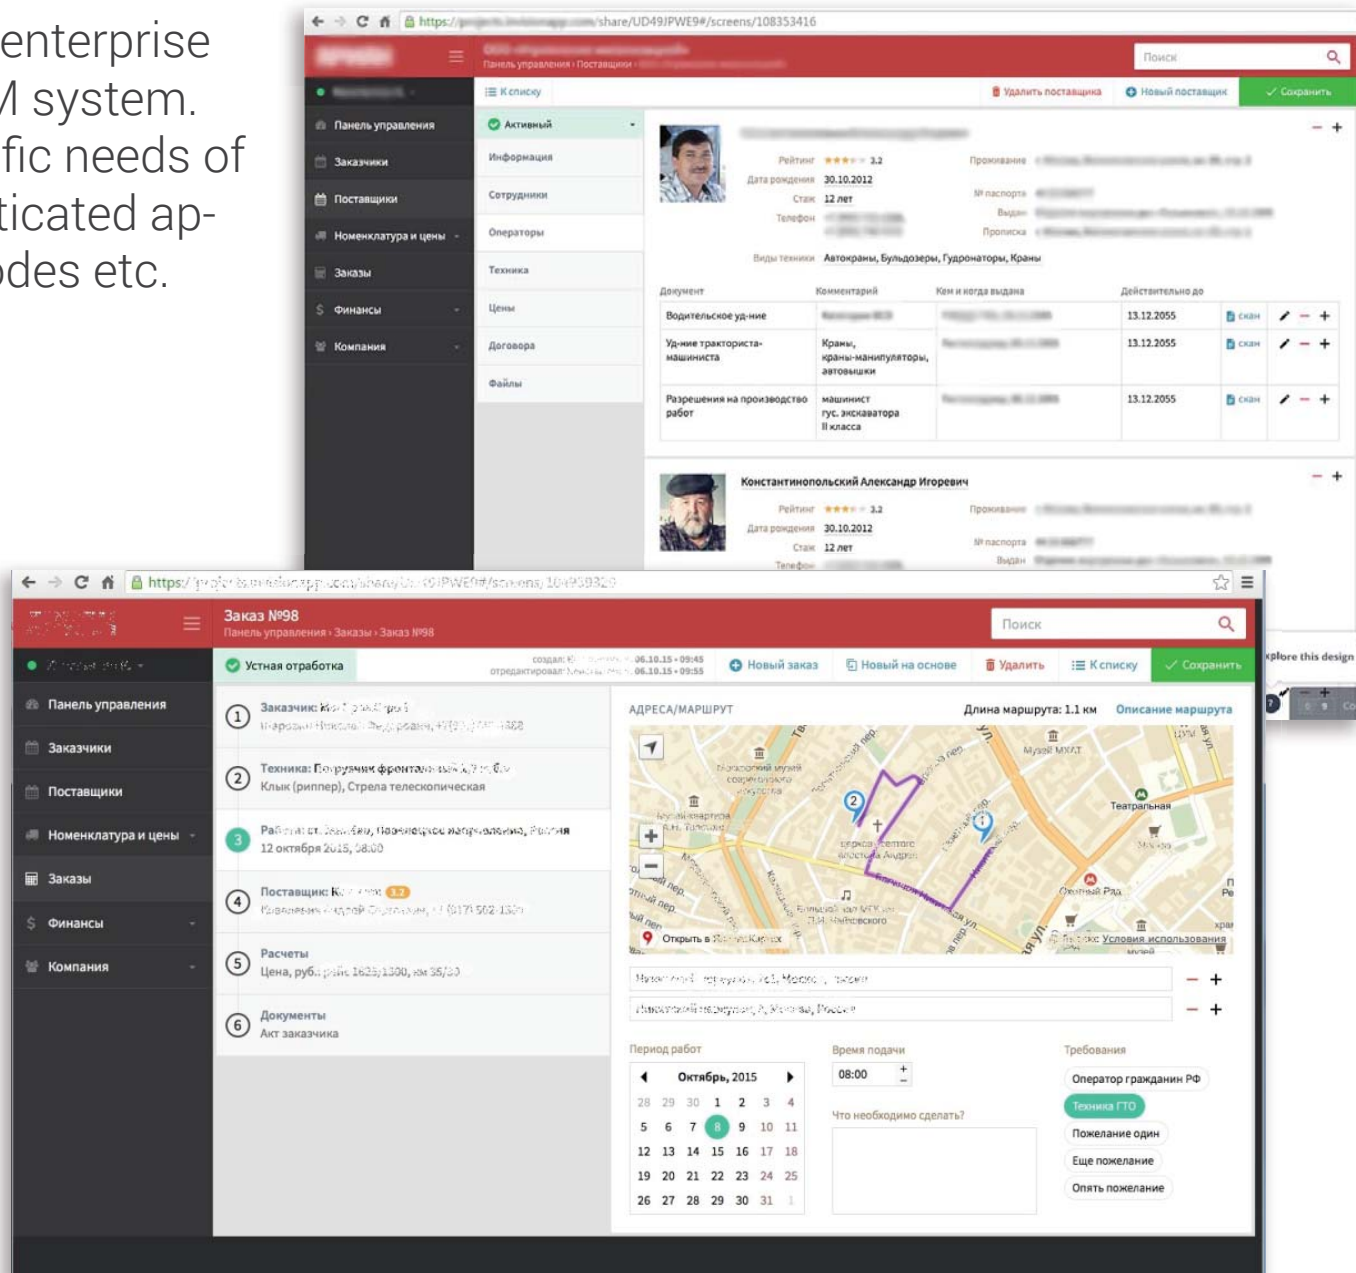

CRM SYSTEM

We have experience in the complex enterprise solutions development such as CRM system. It's custom solution that meet specific needs of a customer's business. It's a sophisticated application with huge set of forms, modes etc.

Stages:

- ✓ Requirements identifying and gathering
- ✓ System design
- ✓ Development
- ✓ Project testing and launch

The project was implemented for WEB, which allows accessing the system anywhere at any time

Some of our work

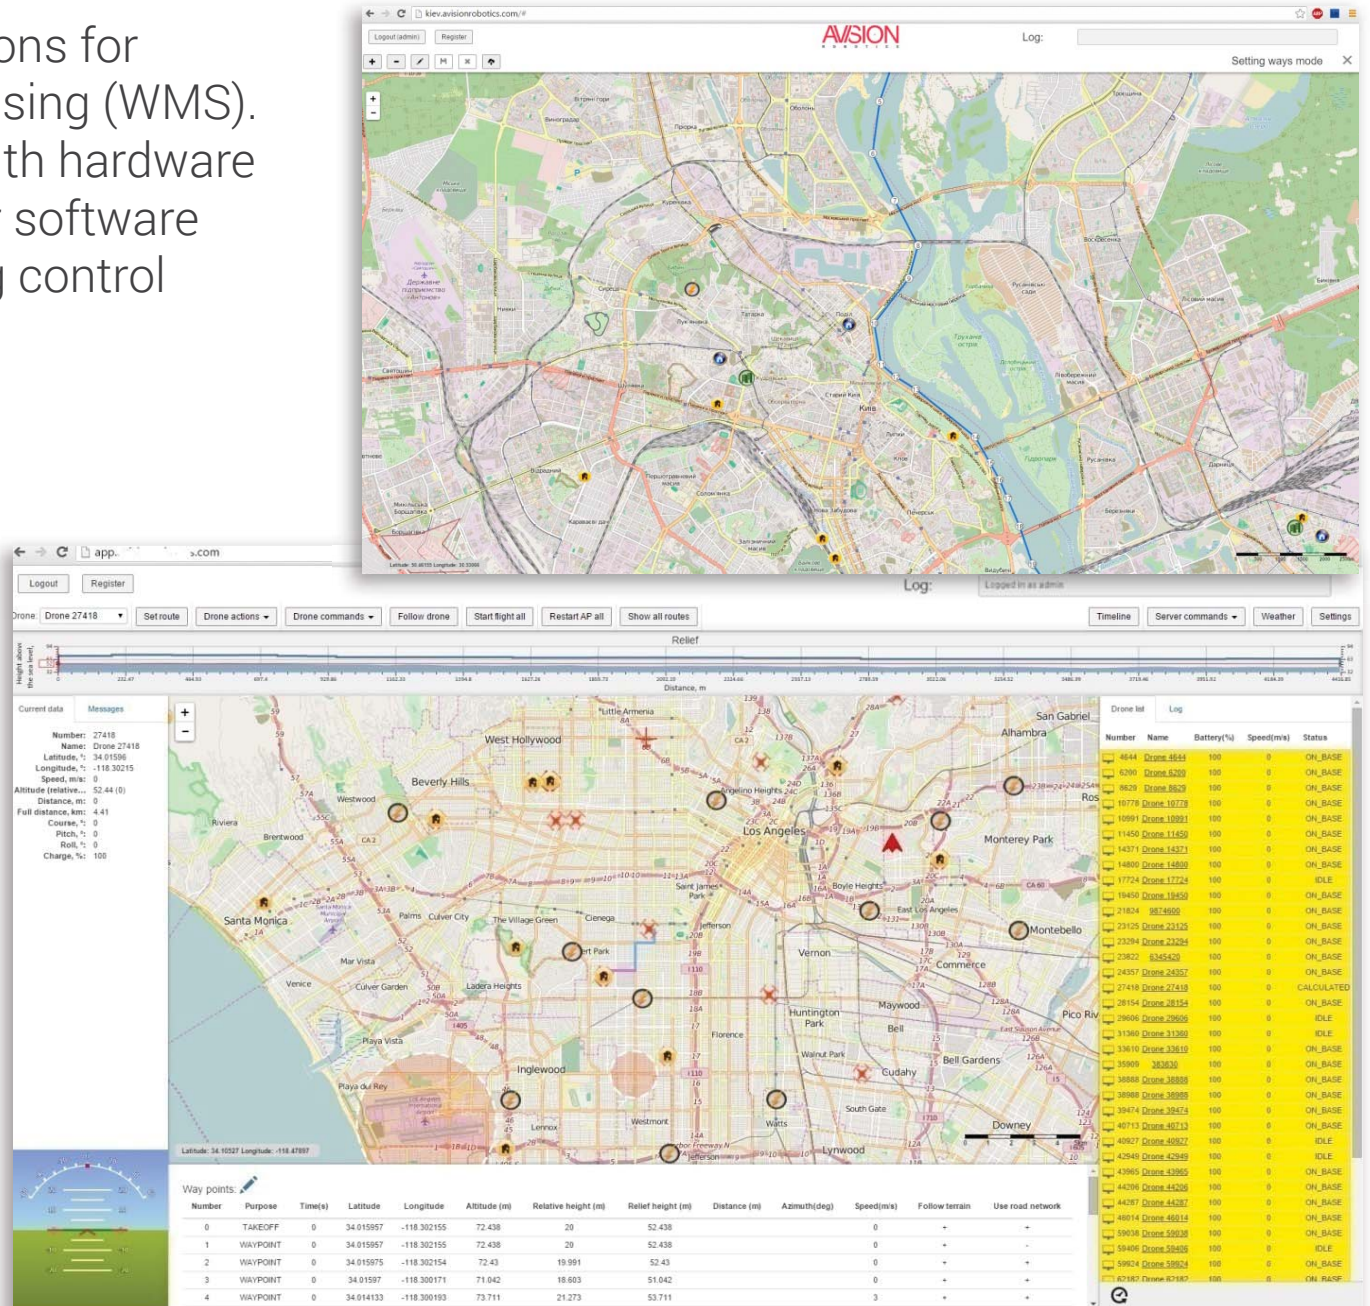

TRACKING SYSTEM AND C&C CENTERS

We develop complicated applications for Logistics, transportation, warehousing (WMS). Our solutions can be integrated with hardware sensors, devices, vehicles or other software systems to gather data or sending control commands.

Stages:

- ✓ Requirements identifying and gathering
- ✓ System design
- ✓ Development
- ✓ Project testing and launch

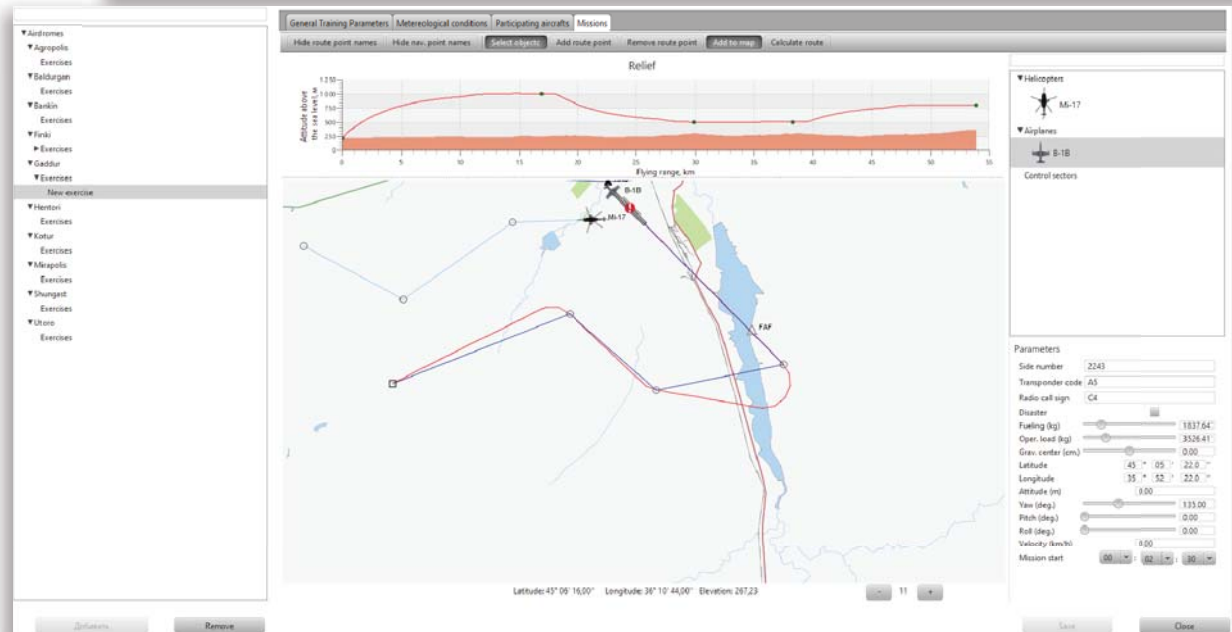

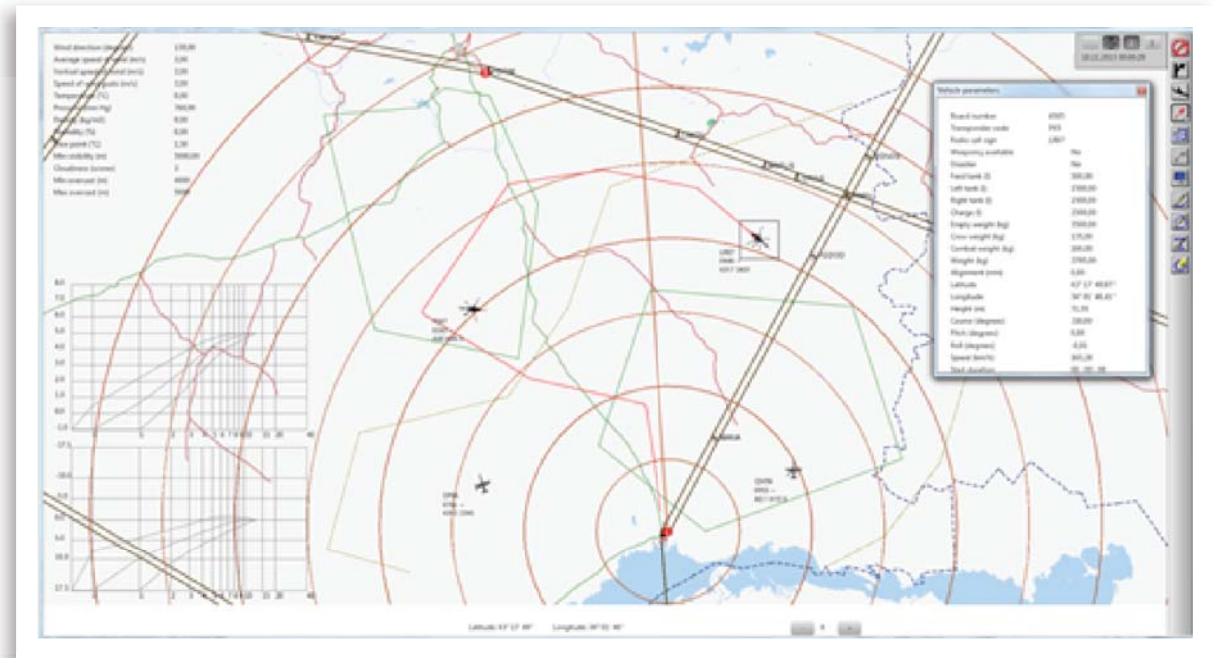

We develop web-based operator workplaces to have situational awareness about geographically distributed processes.

AIR TRAFFIC CONTROL SIMULATOR

Features:

- ✓ Operations with traffic routes of civil aviation
- ✓ Air navigation environment modeling
- ✓ Database modeling of the airports and routes (including traffic schemes, coordinates, etc.)
- ✓ Air traffic simulation module
- ✓ Radar station modeling
- ✓ Load of the current statuses and flight plans in the dispatch center
- ✓ Server “black box” of the UAV and aircraft
- ✓ Network protocol(HLA) support
- ✓ Common virtual environment
- ✓ Instructor work place
- ✓ Faults modeling

Our achievements

GOLD WINNER OF VERNADSKY CHALLENGE 2015

Engineering Startup Contest from Noosphere Ventures with a prize fund of 500,000 UAH

3RD PLACE AT NASA SPACEAPPS CHALLENGE 2016

a global hackathon

2ND PLACE AT GET IN THE RING

an international startup tournament

THE FINALIST OF SIKORSKY CHALLENGE 2015

IV Startup contest of the innovative projects festival
